- Designed and developed the Lindt Gold Bunny site
- Built the new Motorola music portal, MOTOMUSIC.com.au

March 2020 to Present

Board member - Equipment manager

MyFootballClub

London, UK

Web Designer/Developer

April to July 2007

Designed the MyFootballClub launch website which brought together 32,000 football fans from 180 countries together in a crowd funding venture to raise over \$2 million to purchase an English football club. MyFootballClub bought the lower league team Ebbsfleet United in 2007, ending a remarkable first season by winning the FA Trophy at Wembley.

The official unofficial England 2006 World Cup Song

London, UK

Web Designer/Developer

Dec 2005 to June 2006

"I could write a world cup song" a friend boasted in the pub one night and within 10 minutes, four of us hatched a plan to release our World Cup anthem on the web.

My role was to:

- Code the site, which included audio and video streaming
- Create and manage the database and develop a voting system

Scoring over 800,000 hits in 52 countries within a month, we were perhaps a little too successful. Having used a reworking of the Dad's Army theme tune, the publishers wouldn't give us permission to release the song - but instead allowed Sony to do so!

Clients: *Honda Singapore, Honda Australia and Lindt, Motorola.*
